

AccessionIndex: TCD-SCSS-T.20121208.135

Accession Date: 8-Dec-2012

Accession By: Dr.Brian Coghlan

Object name: NuBus cards for Apple Macintoshes

Vintage: c.198x

Synopsis: Plugin cards for the Apple Macintosh NuBus expansion bus.

Description:

George White was an MIT-graduate who became an influential designer, and who with Dave Godeau and Jeff Arnold created the elegant IEEE 1196-1987 32-bit NuBus standard, originally developed at MIT for the NuMachine built under subcontract by Western Digital (and LMI), then built into the LMI Lambda, and into Texas Instruments Explorer AI machines after they took over that part of Western Digital, and ultimately used by Apple for Macintosh-II products. White, Alan Slipson and Charles Hobbs subsequently started Corollary Inc, see Corollary Corollary XM SMP elsewhere in this catalog.
