Hi Brian,
Good to hear from you. I think I have a G1 (developer release) lying around somewhere that I'm happy to donate. I'm abroad at the moment, but I'll touch base when I'm back in Dublin and can check.
Best regards,
Mads

Subject: [Scss-staff] donate iPhone 1 or first Android mobile to Computer Science Collection ?

Dear Colleagues, apologies for invading your bandwidth.
Professor Byrne asked that we continue to collect novel items for his Computer Science Collection, specifically mentioning the iPhone 1 and the first Android mobile (T-mobile G1, also known as HTC Dream). A decade later we have yet to acquire either of these items, which is why I am launching this appeal.
We would be very grateful to anyone who can donate either one, first come first serve.

Except for them we do have a quite complete collection of mobiles, including the first GSM mobile (Nokia 1011), the next generations G2, G3 and G4, single-band, dual-band, tri-band, quad-band and multi-band mobiles, which increasingly represent our personal computing. See <https://treasures.scss.tcd.ie/> and use your browser 'Find' for 'mobile'.
   Regards, Brian [curator of the Collection]
