

AccessionIndex: TCD-SCSS-T.20250909.001

Accession Date: 9-Sep-2025

Accession By: Prof.Patrick Wyse Jackson

Object name: Apple Power Mac G3 Yosemite

Vintage: 1999

Synopsis: Blue and White desktop Apple Macintosh. S/N: CK9131ULEPR.

Description:

The Apple Power Mac G3 (Blue and White), codenamed *Yosemite*, was introduced in January 1999. From Wikipedia: *"It is the first Power Macintosh model to include the New World ROM, and the last with ADB port. ... Though still based on the PowerPC G3 architecture, the Blue and White was a totally new design. It was the first new Power Mac model after the release of the iMac, and shared the iMac's blue-and-white color scheme."*

This item has a 300MHz PowerPC G3 CPU with 512kB of cache and 64MB of SDRAM memory, and a 6GB hard disk.

Early Blue and White units shipped with Mac OS 8.5.1, while later revisions shipped with 8.6. The latest version of Mac OS that can be run on this model is Mac OS X 10.4 Tiger. This item was manufactured on 31st March, 1999.

Many thanks to Patrick Wyse Jackson for donating this item.
