● ● Mathiputer Diagnostics

(/cybernetic/MathiPuter_CPD-35-749c.jpg)

The motherboard is located in display chassis. Note all of the Fairchild chips, dated from 1973-'74. I have identified the suspect transistor and resistor ([/cybernetic/MathiPuter_suspect-components.jpg](#)) that are out image for larger view.

A Fairchild SL30342 with a production date of early April 1974.
