AccessionIndex: TCD-SCSS-T.20251022.009

Accession Date: 22-Oct-2025 Accession By: Dr.Brian Coghlan

Object name: Adaptec ACB-4000 SCSI-1 controller

Vintage: 1985

Synopsis: External 5.25" MFM Winchester disk controller.

Description:

The Adaptec 4000 is a controller that interfaces a host computer via the ANSI X3T9.2/82-2 Small Computer System Interface (SCSI) with up to two 5.25" or 3.5" ST506/412 MFM-encoded Winchester disk drives. The host is connected via a 50-pin SCSI-1 cable. For the host, it obeys the SCSI standard command set. Internally it uses a 1kB dual-ported buffer for 1:1 interleaving of host and disk operations.

For the disk, it supports 16 heads and 2048 cylinders, variable sector sizes of 256, 512 or 1k bytes, and provides sector-level defect skipping, 32-bit ECC of both ID and data, and persistent configuration (stored on the drive). The drive is connected via 20-pin MFM data cable and a 34-pin control cable.

The controller uses an Intel 8085 microprocessor and an Intel 8156H multifunction device (256byte static RAM with three I/O ports and timer), with firmware in an Intel 2764 8kB EPROM, plus three custom chips: Adaptec AIC-010 serializer/deserializer (SERDES), AIC-250 MFM encoder/decoder (ENDEC) and an AIC-300 buffer controller.

The +5V and +12V power supplies are connected via a standard Molex connector.

Many thanks to Brian Coghlan for donating this item.
