SAN Storage Systems:
- E-Series V Systems
- E-Series Systems
- NST Hybrid Storage

Storage Systems:
- Data Archiving Systems
- iSCSI SAN Systems

Scalable Storage:
- RDX HDD Storage
- LTO Tape Storage
- Data Cartridges

Mobile Security:
- Defender Collection
- DataLocker EncryptDisc
- Mobile Security Flash Drives
- Stealth Zone MWES

Consumer Products:
- External Hard Drives
- Internal Docking Station

Imation Solutions:
- By Application
- By Industry
- Scalable Storage
- Mobile Security

Features & Benefits:

Features	Benefits
Storage Management Software is Included	All storage management software is embedded and integrated into Nexsan iSeries including virtualization, snapshots, replication, mirroring, data migration and more to reduce costs and simplify management
Storage Virtualization	Create 1000s of custom volumes that precisely address the needs of individual applications, eliminating storage waste.
Ease of Use	Automated management eliminates time consuming administrative tasks. Deploy a complete SAN in minutes instead of hrs. Simple iSCSI connectivity
Integrated with Microsoft	Take advantage of Microsoft VSS (Virtual Shadow Service) to make data consistent snapshots
Low Cost Scalability	Scale capacity without having to purchase more SAN appliances
Enterprise Performance	Place data and logs on separate physical RAID sets within the same system optimizing database performance. SAN controllers are independent and active/active.
Scale Capacity with Performance	Nexsan iSeries adds performance each time additional disks are added. Nexsan iSeries capacity is expanded by adding more Nexsan SAS/SATA storage systems. Each additional Nexsan SAS/SATA storage system has its own performance engine which includes up to 4GB of cache and 4 RAID engines.
Create Performance and Capacity Tiers	Combine SAS for performance and SATA for capacity and provision bandwidth to ensure SLA's are met.
Flexible	Combine SAS + SATA in the same chassis for the ultimate in application flexibility. Share RAID storage with FC or NAS environments
Highly Available	Unique multi-path – multi-access architecture provides continuous data access. Fully redundant hot swappable components are designed for 99.999% availability. Ensure continuous access during Nexsan iSeries software upgrades or system outage with active / active independent and redundant Nexsan iSeries appliances. Storage services failover instantaneously and automatically without any service disruption.
Energy Efficient	Industry leading energy efficiency delivering 'Speed with Green' with AutoMAID™ Technology
Affordable	All storage services included. No hidden costs or license fees
ISCSI SAN Appliance	• Virtualization • Snapshots • Replication • Mirroring • GbE host ports • Intuitive management
RAID Storage	• Up to 42 disks in 4U of space • SAS+SATA • Flexibility • 4 RAID engines • 4GB cache • AutoMAID™
