That's because whether you're across town or halfway around the world you can manage all Nexsan storage products remotely. Our management capabilities are intuitive and easy to use. They require minimal training. And all of our interfaces provide different levels of security to ensure proper authentication and prevent unwanted users from gaining access.

Nexsan iSeries provide easy and secure management of the integrated storage software via the iSeries Management software. You can install the Management software on a Windows or Linux system and securely access it via a browser-based GUI. The GUI is intuitive and includes several wizards, making it quick and simple for you to efficiently manage storage resources for a few servers to hundreds. And the iSeries Management software enables you to administer many different local and remote systems with a single interface.
