Description:

From 1999 the Department of Computer Science in Trinity College Dublin was involved in Grid computing. From 2001 it was a non-funded participant in the EU DataGrid project (led by CERN) and a funded participant its successors, and from 2002 was a participant in the EU CrossGrid project (led by CYFRONET) and its successors. This item presents the proceedings of a 2004 workshop on Grid computing organised by CYFRONET in Cracow, Poland. See elsewhere in this catalog for literature and hardware for the world wide computing Grid.
