AccessionIndex: TCD-SCSS-V.20210916.001
Accession Date: 16-Sep-2021
Accession By: The Computer Conservation Society
Object name: Investigating the Work and Life of Percy Ludgate (1883-1922)
Vintage: 2021
Synopsis: Brian Randell, video of and slides for Zoom presentation about Percy Ludgate to The Computer Conservation Society (CCS), U.K.

Description:
This presentation[1], the recent IEEE technical[2] [1] and RIA historical[3] [2] papers, and the detailed background document [3], report on the first substantive investigation and discoveries in fifty years about the work and life of Percy Ludgate. This ongoing pro bono investigation was begun in 2016 by Brian Coghlan under the aegis of the John Gabriel Byrne Computer Science Collection, and then Brian Randell, Paul Hockie, Trish Gonzalez, David McQuillan and Reddy O'Regan agreed to join with their specialist knowledge and skills. It has been further aided by joint outreach activities with the Ludgate Hub (an e-commerce hub opened in 2016 in Ludgate's birthplace, Skibbereen).

The presentation by Prof.Brian Randell was made via the CCS's first "hybrid Zoom", i.e. both to a audience and over the Internet (in this case with the presenter online too), building on the success with Zoom during the Covid19 pandemic of 2020 and 2021. The presentation outlined the new details and understandings of Ludgate's life and work that had been discovered discovered by the investigation.

Many thanks to the CCS for permission to preserve and publish this presentation.
