

AccessionIndex: TCD-SCSS-U.20121208.044

Accession Date: 8-Dec-2012

Accession By: Prof.J.G.Byrne

Object name: Various Sliderules

Vintage: c.19xx

Synopsis: Sliderules.

**Description:**

The manufacturer of these sliderules is as yet unidentified.

Photographs courtesy Prof.J.G.Byrne and Dr.Arthur Hughes.

## THE WAVIN PIPE FRICTION COMPUTER AND METRICATION CONVERTOR

### Instructions for use

- (1) Scale "B" shows the PIPE INTERNAL DIAMETER between 2 and 24 inches, whilst Scale "A" indicates NOMINAL PIPE DIAMETER, according to B.S.S. CLASS.
- (2) Scale "C" shows the rate of FLOW through a pipe in Gallons per hour, whilst Scale "D" indicates the equivalent flow in cubic feet per second.
- (3) Scale "E" shows the LENGTH of PIPELINE in Feet.
- (4) Scale "F" shows FRICTION LOSS through a pipeline in Feet Head Pressure, whilst Scale "G" indicates the equivalent pressure in Pounds per Square Inch.

- (5) By means of the CURSOR, line-up any two out of the three variables known in quantity, (i.e. Diameter and Flow or Pipe Length and Pressure Loss). Next move the Cursor along the slide rule to line-up with the third variable of known quantity and the value of the fourth variable can be read directly off the adjacent scale.
- For METRIC CONVERSION — Simply reverse the slide rule and read off values by means of the CURSOR.
- For METRIC OPERATION — Carry out Operation (5) above using Scales "H" to "O" as previously.
