

AccessionIndex: TCD-SCSS-W.20171112.001

Accession Date: 12-Nov-2017

Accession By: Dr.Brian Coghlan

Object name: IBM PC DOS 2.10

Vintage: 1983

Synopsis: IBM Personal Computer Disk Operating System Version 2.10 (PC DOS).

Description:

Microsoft Corporation provided IBM with their MS-DOS, which IBM modified to create their only slightly different PC DOS Operating System for their Personal Computer (the venerable PC). This item is Version 2.10, released in Nov-1983, and packaged on two 5.25 inch floppy disks with an extensive user's manual, see elsewhere in the Literature category of this catalog. One floppy disk contains the PC DOS 2.10 operating system itself, the other contains associated "Supplemental Programs".

This item also includes a floppy disk containing Supplemental Programs version 3.2 of 12-Mar-1987, and another floppy disk containing Hercules Graphics Card software for PC DOS 2.10 (the Hercules graphics card was a very popular bus adapter for the early IBM PCs).
